Table of Contents: Volume 26

Number 1

Editorial . . . . . *John A. Stankovic, Wolfgang Halang and Kim-Fung Man* 5

Guest Editorial . . . . . *Luiz Bacellar and Wolfgang Schroeder-Preikschat* 7

The Distributed Time-Triggered Simulation Scheme: Core Principles and Supporting Execution Engine . . . . . *K. H. (Kane) Kim* 9

An Adaptive Middleware for Context-Sensitive Communications for Real-Time Applications in Ubiquitous Computing Environments . . . . . *Stephen S. Yau and Fariaz Karim* 29

Memory Management for Real-Time Java: An Efficient Solution using Hardware Support . . . . . *Teresa Higuera, Valérie Issarny, Michel Banâtre, Jean-Philippe Lesot, Frédéric Parain and Gilbert Cabillic* 63

Real-Time Garbage Collection for a Multithreaded Java Micro-controller . . . . . *Matthias Pfeffer, Theo Ungerer, Stephan Fuhrmann, Jochen Kreuzinger and Uwe Brinkschulte* 89

Integrating Data Flow Equations with UML/Realtime . . . . . *Lutz Bichler, Ansgar Radermacher and Andreas Schürr* 107

Number 2

Modeling Complex Real-Time and Embedded Systems—The UML and DORIS Combination. . . . . *M. E. C. Hull, S. Ewart, R. J. Millar and J. R. P. Hanna* 135

Mode Change Protocols for Real-Time Systems: A Survey and a New Proposal. . . . . *Jorge Real* 161

Probabilistic Schedulability Analysis of Harmonic Multi-Task Systems with Dual-Modular Temporal Redundancy . . . . . *Jae Kwon Kim and Byung Kook Kim* 199

Number 3

Design of H_2 Controllers for Sampled-Data Systems with Input Time Delays . . *Kwang Sung Park, Jin Bae Park, Yoon Ho Choi, Zhong Li and Nam Hyun Kim* 231

Replication Management in Reliable Real-Time Systems . . . . . *Luís Miguel Pinho, Francisco Vasques and Andy Wellings* 261

Schedulability-Driven Communication Synthesis for Time Triggered Embedded Systems . . . . . *Paul Pop, Petru Eles and Zebo Peng* 297
